3-ESS3 Earth and Human Activity Students who demonstrate understanding can: 3-ESS3-1. Make a claim about the merit of a design solution that reduces the impacts of a weather-related hazard.* [Clarification Statement: Examples of design solutions to weather-related hazards could include barriers to prevent flooding, wind resistant roofs, and lightning rods.] The performance expectations above were developed using the following elements from the NRC document A Framework for K-12 Science Education. **Science and Engineering Practices Disciplinary Core Ideas Crosscutting Concepts Engaging in Argument from Evidence** ESS3.B: Natural Hazards **Cause and Effect** Engaging in argument from evidence in 3–5 builds on K–2 A variety of natural hazards result from natural processes. Cause and effect relationships are routinely experiences and progresses to critiquing the scientific Humans cannot eliminate natural hazards but can take identified, tested, and used to explain change. explanations or solutions proposed by peers by citing relevant steps to reduce their impacts. Make a claim about the merit of a solution to a problem Connections to Engineering, Technology, by citing relevant evidence about how it meets the criteria and constraints of the problem. (3-ESS3-1) and Applications of Science Influence of Engineering, Technology, and Science on Society and the Natural World Engineers improve existing technologies or develop new ones to increase their benefits (e.g., better artificial limbs), decrease known risks (e.g., seatbelts in cars), and meet societal demands (e.g., cell phones).
